

DS-7

UV-Vis Spectrophotometer

- 1 μ L UV-Vis and Optional Cuvette Absorbance
- Quantify 2 - 15,000 ng/ μ L dsDNA
- Maintenance Free, No Recalibration Required

DS-7: A New Addition to the DS-Series

DS-Series instruments offer a wide choice of model offerings to find the perfect combination of measurement options for your lab's sample QC.

Based on the award-winning DS-11 technology, the DS-7 spectrophotometer offers **high performance quantification at a budget-friendly price.**

Proven DeNovix Technology

Based on the patented innovations that make DeNovix Spectrophotometers trusted by scientists worldwide, the DS-7 ensures confidence in every measurement.
